Livestock Waterer "Easypad"

Eliminates having to buy forming materials, steel and, of course, the labor to make a pad when the summer is short already. Poured in place inserts and bottom stand offs so that pad can be picked up with a front end loader, pallet forks or even bale forks if spacing is correct and they are strong enough. Built to a standard to withstand Concrete's heaviest bowl and livestock weight using the same dry pour 800 psi concrete as Concrete's bowls. Fully designed with steel reinforcement to withstand freeze thaw cycles. Corners eliminated as cattle break them off anyway. Rough surface and 14" diameter hole in center to allow for any size riser pipe. 8" x 6" x 4" thick. (2-1-6903)

549.99

Concrete® Cattle Waterer

Concrete waterer that will last through years of use. Engineered to withstand harsh winter, hot summer and heavy cattle use.

C150

Perfect for smaller groups, sick pens, horses and bison. 1 - 200 Head Feeder Cattle. 0 - 50 Head Cows. 33"L x 36"W x 25"H. 700 W. 1 x 98 W. 800 lbs. 19 gallons. (2-1-0300)

1099.99

C250

Excellent choice for cow/calf pens. 200 - 300 Head Feeder Cattle. 50 - 120 Head Cows. 37"L x 36"W x 25"H. 700 W. 1 x 98 W. 1000 lbs. 28 gallons. (2-1-0301)
